

County listing of lakes and streams

Below is a listing of the inland lakes and streams that are managed for trout and salmon, along with their respective type of regulation. For inland lakes, the lake name will appear under the appropriate county and will be followed by a letter (A-F). The letter designates the Type of regulations that apply to that lake. For streams, the stream name will be followed by a number (2-7) and any upstream/downstream boundaries that apply to that section of stream. **Type 1 streams are not listed in the text, but they do appear in green on the maps.** For a complete listing of all trout streams, refer to FO-210 (available at all DNR Fisheries Offices). **Please see pages 15-16 for a description of each Type of regulation.** An **SC** indicates a fishing closure for the area and period mentioned. This guide can also be found online at www.michigan.gov/dnr.
